TESERACT

CREATIVE STUDIOS

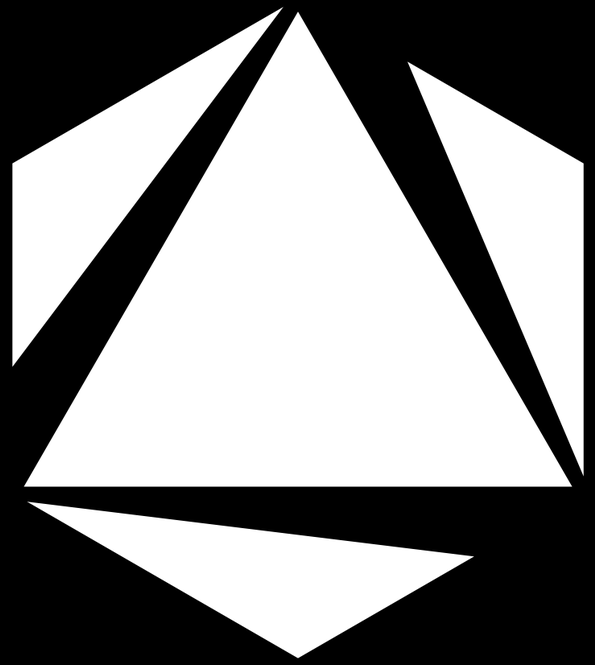

Brand guidelines

Build beyond the ordinary.

OCTOBER 2026

The logo

01

TESERACT

02

CREATIVE STUDIOS

03

01 **Mark**

A centre triangle with three shards set around it, read as one hexagon. It also works alone: favicon, app icon, avatar.

02 **Wordmark**

TESERACT, drawn rather than typed. Each E is three bars and the A has no crossbar.

03 **Line**

CREATIVE STUDIOS, centred under the wordmark.

White on black is the primary version: the website is black-first. Use black on white on light grounds and paper.

Versions

Every flat version comes in white for dark grounds and black for light grounds, as SVG and as transparent PNG; the 3D mark is one PNG. Use the compact versions where the wordmark would be narrower than 200 px.

Clear space

Keep this space free of text, edges and other graphics.
H is the cap height of TESERACT, so the space grows with the logo.
The mark on its own keeps a quarter of its height clear.

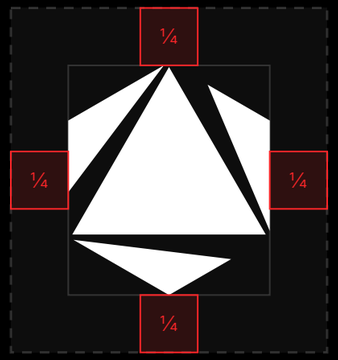

Full logo

H on every side

H on every side, the compact version too

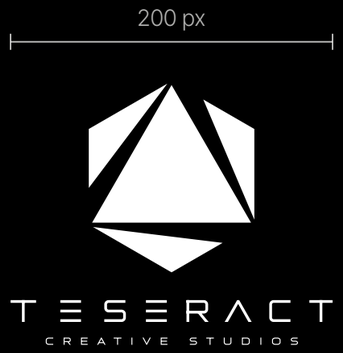

Mark alone

A quarter of the mark's height on every side

Minimum size

The smallest each version may appear on screen, in CSS px.
Shown at actual size when this sheet is viewed 1600 px wide.
Below 200 px the wordmark switches to its compact version.

Full logo

Min. 200 px wide

Mark above the wordmark.

Horizontal

Min. 256 px wide

Its wordmark is then 202 px.

Horizontal compact

Min. 132 px wide

132–255 px wide.
The website header
is this lockup.

Wordmark

Min. 200 px wide

Exact logo proportions.

Compact wordmark

Min. 104 px wide

Below 200 px.
Website header: 152 px,
phones 122 px.

Mark

Min. 24 px tall

The website header on phones.
Browser tabs use the favicon
files, drawn with wider gaps.

Colour

Black first: a true-black page, near-black surfaces for depth, soft-white type and hairline borders. Brand red is the one accent: focus rings, text selection and small signals.

Page ground. Ink on it 19.1:1

TYPOGRAPHY

Inter Tight

One typeface for everything, in its Light weight. Headlines run at −0.04 em (track-head), never tighter than −0.05 em. The wordmark is drawn, never typed.

Aa

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz 0123456789

Build beyond the ordinary.

LIGHT 300 — Everything: headlines, body copy, captions.

Build beyond the ordinary.

REGULAR 400 — Small interface text: buttons, chips, form controls.

Build beyond the ordinary.

MEDIUM 500 — Inline emphasis only.

Brand files use Inter Tight. On Apple devices the website shows the installed Helvetica Neue first, in the same weights; Inter Tight everywhere else. Never embed or share Helvetica Neue.

WEBSITE DESIGN & DEVELOPMENT STUDIO

We don’t build ordinary websites.

We create interactive, thoughtful and tailor-made digital experiences for businesses that want to be different.

Start a Project

Button: 16 px, Regular 400, on Ink, 16 px radius.

Misuse

Always use the supplied files, in white or black, unchanged.
These are the most common ways a logo gets broken.

Don’t stretch or squash it.

Don’t recolour it, not even in brand red.

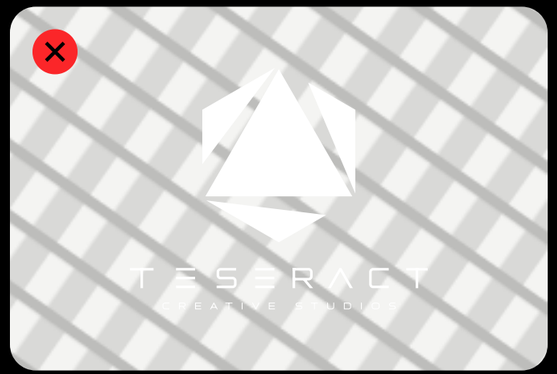

Don’t rotate or tilt it.

Don’t add shadows, glows or bevels.

Don’t retype the name in a font.

Don’t place it on busy, low-contrast grounds.

Don’t rearrange or resize its parts.

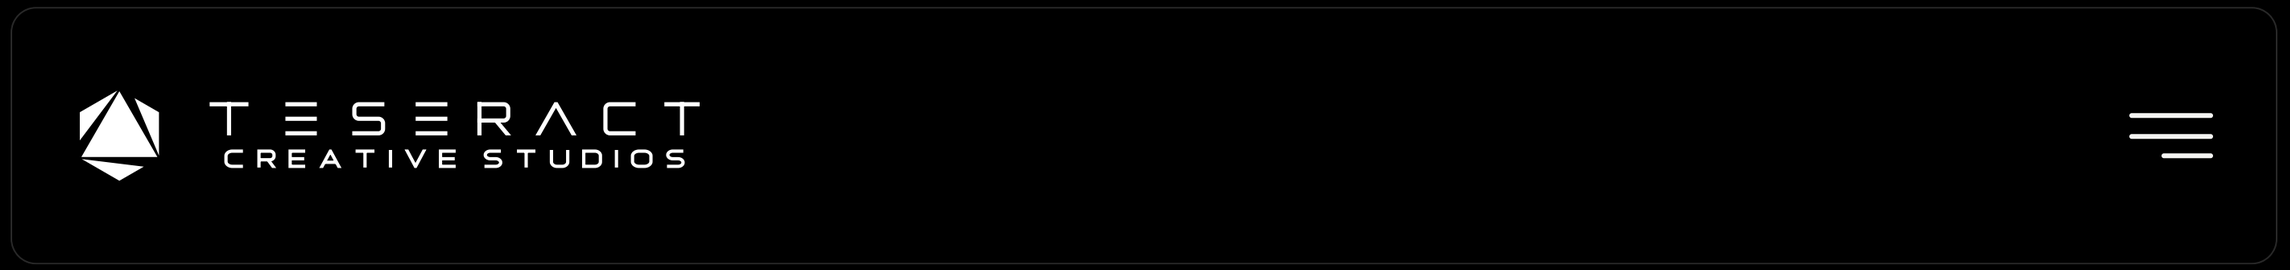

Don’t outline it.

APPLICATIONS

On the web

The header carries the horizontal compact logo. App icons put the white mark on brand black inside the 80 % safe zone; the favicon fills its tile to stay legible at 16 px.

Website header, shown 2×: teseract-horizontal-compact, mark 28 px, gap 14 px, compact wordmark 152 px wide (phones 24 / 11 / 122 px). On hover the mark turns −120°.

Favicon

512 px · 80 % safe zone

This is the kit's black-first set, ready to install with the head tags in README.txt. The live website still ships its earlier icons, a dark mark on white (the SVG favicon turns light in dark mode), and the 3D logo on white as its link preview.

Link preview

og-image-1200×630.png · black ground, full logo, tagline

Social

Profile pictures carry the mark alone, centred for circle crops.
Covers and stories carry the full or horizontal logo with the tagline.

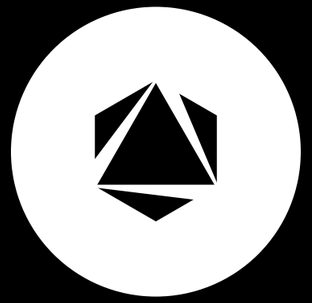

LinkedIn banner
1584 × 396 · the logo sits right, clear of the profile photo

Story
1080 × 1920

Avatar, dark 1080 px

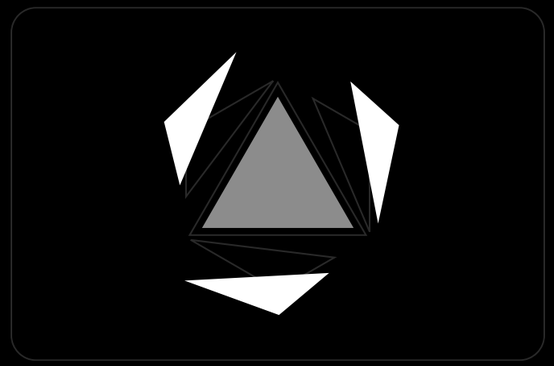

Avatar, light 1080 px

Social images use brand black (or white for the light avatar), the logo files and the approved lines only: “Build beyond the ordinary.” and “BUILT DIFFERENT. BUILT FOR YOU.”

MOTION

The logo in motion

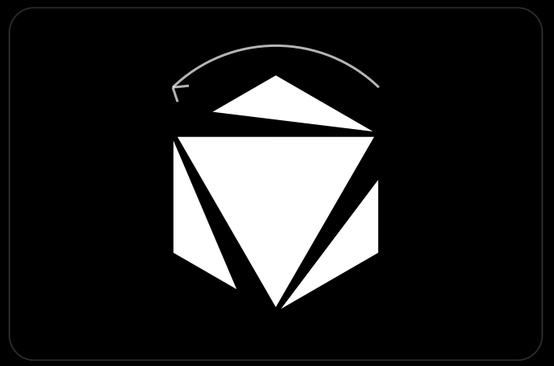

On a first visit the shards assemble, turn and fly into the header in about 2.9 s.

1 · Assemble

0 – 1.04 s

The centre triangle rises; the three shards tumble in and seat with a click and a glint.

2 · Turn

0.92 – 1.70 s

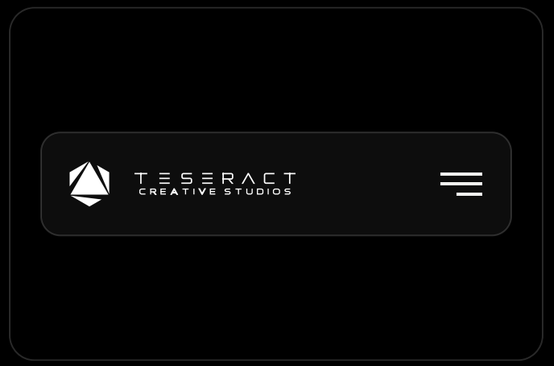

The mark makes the header's own −120° turn, counter-clockwise.

3 · Name

1.42 – 2.26 s

The mark docks left; TESERACT / CREATIVE STUDIOS slides in from the right, letter by letter.

4 · Land

2.26 s – about 2.9 s

The lockup flies into the live header logo while the black stage lifts.

Rules

The intro plays once per tab session and any click, key or scroll skips it. It never plays with reduced motion, Save-Data or forced colours. Header hover: the mark turns −120° in 0.7 s on --ease and the name dims to 78 %. Motion is transform and opacity only.

--ease	cubic-bezier(.22,1,.36,1)	Shared easing, the hover turn
--ease-lock	cubic-bezier(.3,1.25,.55,1)	Shards seat with a slight overshoot
--ease-fly-x / -y	(.62,0,.18,1) / (.4,0,.1,1)	The flight into the header
--ease-lift	cubic-bezier(.7,0,.2,1)	The stage lifts
--spring	400 ms, spring 400/30/1	Interface appear
